***Allowable Subject Matter***

1. Claims 27-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art the claimed transparent polymer substrate formed by a solvent casting method, comprising a polycarbonate resin having bisphenol A and 9,9-bis(4-hydroxy-3-methylphenyl)fluorine as bisphenol components and having a water absorption coefficient of 0.7% or less and a total light transmittance of 80% or more.

The closest reference USPAT 6,183,829 (Daecher) discloses a plastic sheet produced by a process comprising the step of providing molten plastic resin. Daecher further discloses that the plastic sheet comprises 9,9-bis (4-hydroxy-3-methylphenyl) fluorine. However, the declaration filed by the applicant on 05/27/03 and 12/03/03 are sufficient enough to overcome the rejection based on Daecher since the declaration (1) shows that Applicant's claimed invention cannot be made from the disclosure of Daecher and (2) demonstrates the unexpected superiority of the instantly claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
